

Phase 3: Digital Detox Divorce

CONGRATULATION!

You made it through and you're still breathing!

Who would have thought that you could actually **#LIVECELLFREE** in today's society.

Well, as you just experienced, it is still possible and is a necessity for those who wish to retain their *Freedom, Identity and Privacy*.

Due to recent world events (2020), we find ourselves under the watchful eye of big brother, surveilled through our (dumb) cellular phones and all of our digital interactions on a daily basis.

With the advent of 5G, 'SMART' Grids, 'SMART' Cities and the internet of things (IoT), we need only look at *China as the model that the supposed 'FREE' world will embrace with open arms in the name of: *Safety, Health and Technological Advancement*. **But at what price?**

FYI: CHINA HAS SUPPOSEDLY SOLD ITS SURVEILLANCE MODEL TO OVER 100 HUNDRED COUNTRIES. ^{1,2,3,4}

So you're probably asking yourself:

"Where do I go from here?"

Great question!

The next and final step on your **#LIVECELLFREE – DIGITAL DETOX** journey really boils down to anchoring in this new way of life so that you own it. In order for you to truly commit and get value out of your experience, we are putting together a **#LIVECELLFREE 'Advocate' Package**. Like the two previous phases, you will receive the steps to take in order to complete and anchor the process. Please note that the advocate package does not oblige or commit you to having to recruit new participants, unless you freely choose to do so. The fact that you live cell free simply implies that you advocate a way of life without a cellular phone. That why it is really called the *'Advocate' Package*, rather than the Divorce. Even though you are ending the relationship you had with cellular phones, you are embracing a completely new way of empowered living.

Please understand that the only reason our world is in the state it is (regarding the dangerous effects of artificial electromagnetic radiation) is due to the demand the population makes on the telecommunication industry. It is quite easy to blame the telecommunication industry, saying it is their fault because they lied and hid the truth. Yet in reality, from the moment we know the truth, it becomes our responsibility and within our power to do something about it.

“Truth is only powerful when acted upon!”

Without action, awareness of truth turn into the poison of self-belittling for not having done what we know to be just.

Just as the population demanded organic food over genetically modified foods filled with toxic insecticides and pesticides at the turn of the century, so can it be with the telecom industry. Consumers have the ultimate power. We need but exercise our fundamental right to free speech and choose to no longer use wireless technology. Remember #LIVECELLFREE is not against technology, its advocates the safe and ethical use of technology.

The Next Step:

It is thanks to individuals like YOU, advocating for safe and ethical use of technology via wired connections that we can continue to operate and spread the message:

“Our mission is to bring Hope to Humanity that we CAN and MUST live differently.”

While the #LIVECELLFREE ‘*Advocate*’ Package is under development here is what you can do...

1. Spread the word and help others embark on their journey towards living cell free;
2. Write to us via and share your ‘before and after’ experience of phase 1 and 2, how it impacted your life and your motivations to commit and become a #LIVECELLFREE ‘*Advocate*’.
3. Register with <https://www.echoearth.org/> – End Cellphone Use On Earth
